

## Swift. Powerful. Sure.

We know staffing firms like yours are taking on the immense challenge of filling newly available positions based on the demand placed on the supply chain. We also know that streamlined hiring, including rapid turnaround background checks, will be vital in meeting this urgent need.

## ASURINT IS HERE TO HELP

### Our Technology

Time is of the essence now more than ever when it comes to performing candidate and volunteer background checks. Asurint can deliver fast pre-employment background screening services; **up to 27% faster** than traditional screening, with turnaround averaging **less than one day** for our staffing clients. Our smart proprietary national technology IQLogics, provides comprehensive, fast and accurate background screens. We've also developed the ability to **instantly clear** many of your candidates or volunteers nationwide!

#### What's an Instant Clear?

A "clear" is when a candidate's background search comes back with no criminal history. While Asurint is working every day to add more court systems to our system, we currently offer instant clears in many states and the majority of the most populous counties in the states to the right!

### Our People

When you work with Asurint, you work with a collaborative team that has your best interest at heart. Our team puts a lot of pressure on itself to complete the most accurate and compliant searches possible. From the very beginning when you first contact Asurint, through each background screen and question, we're here for you and ready to help.

### Our Process

As a client's journey moves from sales to onboarding through implementation and support, we keep asking questions. We start with a deep dive into a business to find pain points, determine future goals and identify areas where better, more concise searches can be implemented to improve the overall employee search process and the business.

CRIMINAL BACKGROUND CHECKS MORE EFFICIENT THAN EVER BEFORE.

## IQLogics™ is the industry's first search engine.

**We've made background checks better.** Asurint excels where most background check systems fall short. That's because traditional methods often rely on applicants accurately self-reporting all addresses, then relying on manual methods to search countless court systems.

By contrast, **Asurint uniquely utilizes the power of IQLogics™.** The proprietary algorithm behind IQLogics intelligently recommends the best background search for every candidate. **That means you get a more cost-effective, comprehensive and time-efficient search.**

### Why you'll love IQLogics

-  You'll uncover accurate results not seen in traditional searches.
-  You'll achieve faster placement, greater revenue and better client relationships.
-  You'll receive the most complete picture on every candidate...faster than ever before.

7/10 HR professionals choose Asurint over their current provider

# 85%

of U.S. applicants that could be instantly cleared
